Why Your Business Is The PERFECT Target For Hackers... *And What You Need To Do NOW To Protect Yourself*

Everybody gets hacked, but not everything makes the evening news. We hear about big companies like Target, Home Depot, Capital One, and Facebook getting hacked. What we rarely hear about are the little guys – the small businesses that make up 99.7% of employers in the United States, according to the Small Business Administration. It's these guys who are the biggest targets of cybercriminals.

Basically, if you run a business, that business is a potential target. It doesn't matter what industry you're in, what you sell or how popular you are. Cybercriminals go after everybody. In 2018, a cyber security survey by the Ponemon Institute found that 67% of small and midsize businesses in the U.S. and U.K. were hit by a cyber-attack.

For the cybercriminal, casting a wide

net makes the most sense because it gets results. It puts them in a position where they are able to extort money, steal sensitive information and ultimately profit off of destroying the property, prosperity and reputation of others.

Why do cybercriminals love to target small businesses? There are a handful of reasons why small businesses make sense to attack.

1. **Small Businesses Are The Most Vulnerable.** Business owners, entrepreneurs and executives aren't always up-to-date on network security, current cyberthreats or best practices in IT. They have a business to run and that's usually where their focus is. Unfortunately, that means cyber security can take a back seat to other things, like marketing or customer support.

Continued on pg.2

HAPPY
LABOR
DAY

This also means they might not be investing in good network security or any IT security at all. It's just not top-of-mind or they may feel that because it's never happened to them, it never will (which is a dangerous way of thinking).

2. **Small Businesses Don't Take IT Security Seriously.**

Coming off that last point, it's true that many businesses don't properly secure their network because they feel that they *aren't* vulnerable. They have the mindset of "It hasn't happened to me, so it won't." Along those same lines, they might not even take password security seriously. According to research conducted by Trace Security, upward of 80% of ALL breaches come down to one vulnerability: weak passwords! Even in 2020, people are still using passwords like "12345" and "password" to protect sensitive data, such as banking information and customer records. Secure passwords that are changed regularly can protect your business!

3. **Small Businesses Don't Have The Resources They Need.** Generally speaking, medium to large companies have more resources to put into IT security. While this isn't always true (even big companies skimp on cyber security, as the headlines remind us), hackers spend less time focused on big targets because they assume it will take more of their own resources (time and effort) to get

"67% of small and medium-sized businesses in the US and UK were hit by a cyber-attack."

what they want (money and sensitive data). Many small businesses lack the resources like capital and personnel to put toward IT security, so hackers are more confident in attacking these businesses.

Just because you haven't had any major problems for years – or at all – is a bad excuse for not maintaining your computer systems. Threats are growing in number by the day. While many small businesses might think, "I don't have the time or resources for good security," that's not true! You don't need to hire IT staff to take care of your security needs. You don't need to spend an arm and a leg securing your network. IT security has come a LONG way in just the last five years alone. You can now rely on IT security firms to handle all the heavy lifting. They can monitor your network 24/7. They can provide you with IT support 24/7.

That's the great thing about technology today – while many hackers are doing everything they can to use technology against us, you can use it against them too. Work with a dedicated and experienced IT security firm. Tell them your business's network security needs, and they'll go to work fighting the good fight against the bad guys.

Webinar: Connecting the Modern Workforce

September 10th | 11AM CST

Register, Attend & Receive:

- FREE **Uber Eats** CREDITS
- FREE COMMUNICATIONS AUDIT

[Techsagesolutions.com/modern-workforce-webinar/](https://techsagesolutions.com/modern-workforce-webinar/)

Connect Your Modern Workforce

Talk, text, collaborate & manage communication from any location. Make every conversation count with easy access to data that drives meaningful connections.

- 1 Learn what the future of modern communication looks like
- 2 Empower your team to work anywhere, any time, from any device
- 3 Increase the productivity of your team through advanced voice and business messaging
- 4 Get a free communications audit for your business

Weber Connect Smart Grilling Hub

Grilling can feel like guesswork. You throw the food on the grill and keep a close eye on it, hoping for the best. Say goodbye to guesswork and overcooked steaks with the Weber Connect Smart Grilling Hub.

The Weber Connect takes the thermometer and timer into the WiFi era. It monitors your food and sends updates to your smartphone. It lets you know when to flip the burgers or steaks – and then notifies you again when it's time to take them off the grill. You can even have the Weber Connect tell you when your meat of choice has reached your ideal level of doneness. It's great for those who are new to grilling or don't grill often, and it works with every grill! See more at bit.ly/3eTL69Y!

It's Time For A Smartphone App Permissions Audit

Every smartphone app requests permissions in order to operate. The basic "phone" app needs permission to use the microphone and contacts. This makes sense, and you would never think twice about it.

Other apps can pose problems. Many apps want access to your location, camera or Bluetooth, for example. For

some apps, some permissions make sense. For others, they're a red flag. This is why you need to do an app audit.

On an iPhone, check app permissions in Settings > Privacy. You can view the permissions of every app you have installed and change them, if needed.

On Android devices, app permissions are in Settings > Apps & Notifications (it may be under Apps on older devices). Tap on the app for permission details.

Make An Impact

Why did you decide to start your own company? When I ask business owners and entrepreneurs this question, they most often answer, "I wanted to make a positive impact in the world."

The same is true for me. Yes, sure, I wanted to be my own boss, do work that brings me joy, create my own systems, have financial freedom ... but the endgame was that I wanted to make things better through my business. I wanted (and still want) to eradicate entrepreneurial poverty. To make the world a better place for me, my family and my community.

I know – with the current state of things, you may be feeling as though your dreams are too lofty and need to take a back seat. Your business has a crisis to survive, after all. But you can accomplish both surviving (heck, thriving) and making an impact – even during a pandemic.

You are closer to your dreams than you may feel right now. They don't have to fall by the wayside.

The biggest impact you can make right now is through HOW you serve your clients and community in the face of one of the biggest challenges in our lifetime.

But you can't do that if you don't have a solid foundation in your business.

So let's recap what I have been posting about: The Business Hierarchy Of Needs (mikemichalowicz.com/the-business-hierarchy-of-needs) is the key to your business's success right now.

The needs of your customers and clients have likely changed over the last few months and you may feel stuck in, say, the sales level of the Hierarchy. This is why I created the Recession Response (mikemichalowicz.com/recession-response), which addresses the HOW – how to take steps to ensure your first three levels of The Business Hierarchy Of Needs are in place, so you can go ahead and make your impact in the world.

I invite you to visit the Recession Response for tips and tangible, actionable resources to help you maintain your SALES, PROFIT and ORDER levels of The Business Hierarchy Of Needs, because you can still achieve your dream and impact your community in a positive way.

You were put on this earth to have an impact. And that impact is not achieved by sacrificing yourself or your business. Nail the first three levels of sales, profit and order. Then you can give back to the world and make your impact.

MIKE MICHALOWICZ (pronounced mi-KAL-o-wits) started his first business at the age of 24, moving his young family to the only safe place he could afford – a retirement building. With no experience, no contacts and no savings, he systematically bootstrapped a multimillion-dollar business. Then he did it again. And again. Now he is doing it for other entrepreneurs. Mike is the CEO of Provendus Group. He is also a former small-business columnist for The Wall Street Journal; MSNBC's business makeover expert; a keynote speaker on entrepreneurship; and the author of the cult classic book *The Toilet Paper Entrepreneur*. His newest book, *The Pumpkin Plan*, has already been called "the next E-Myth!" For more information, visit MikeMichalowicz.com.

Back to Basics

A lot of time is spent staying protected from the newest type of scam or the newest cybercrimes, but as is true with many things, remembering the basics is the entire foundation of making sure you, your company and your clients remain safe.

Everyone in the company or organization should know basic security principles. Security principles and policies should be documented and part of every new employee training. Strong password requirements, Internet usage guidelines and only connecting remotely over VPN are examples of some common security policy items. Strict penalties for violating the security policies should be detailed.

It's not a good habit to save files onto your computer if there is a location on the network or on your server where they can live. They're much less likely to be backed up on your computer, whereas they'll reliably and regularly

be backed up if they are saved on the server.

If you use websites or software that do not require regular password changes, set a calendar reminder to change the password yourself every other month.

As with other things, a little prevention goes a long way – remembering the security basics, and asking about them if you don't know what they are, is the single best thing you can do to protect yourself and protect the company.

3 E-mail Productivity Tricks You Need To Know

Turn Off Notifications. Every time you get a ping that you have a new e-mail, it pulls your attention away from what you were doing. It's a major distraction. Over the course of a day, you might get several pings, which can equal a lot of time wasted. Set aside a block of time for reading and responding to e-mails instead.

Use Filters. Many e-mail programs can automatically sort incoming e-mails. You define the sources and keywords, and it does the rest. This helps prioritize which e-mails you need to respond to soonest and which are most relevant to you.

Keep It Short. Most of us don't like to read e-mails – and so we don't. Or we quickly scan for relevant information. Your best bet is to just include the relevant information. Keep it concise and your recipients will appreciate it, and as a recipient, you'll appreciate it as well. *Small Business Trends*, April 23, 2020

No Rules Rules: Netflix And The Culture Of Reinvention

By Reed Hastings And Erin Meyer

Company culture is a big deal. It shapes your business and the people within it, and it can shape your future. In *No Rules Rules: Netflix And The Culture Of Reinvention*, Reed Hastings (co-founder and CEO of Netflix) and Erin Meyer (professor at INSEAD, a global business school) discuss why the company culture at Netflix is worth emulating. They talk about how that culture allows Netflix to thrive and beat back its growing competition and why their approach ultimately works.

Questions about Microsoft Teams?

Are you like so many business owners, asking yourself what really is Microsoft Teams?

Common questions we get include:

- ◆ Can Teams replace my Zoom or GoToMeeting subscriptions?
- ◆ Will Teams cost me extra on top of my existing Microsoft licenses?

If you haven't considered all that Microsoft Teams can do for you, you are behind the times. **At TechSage Solutions we have a Microsoft 365 Certified Teams Administrator Associate who can answer these questions for you today!**

For help, contact Warren at whylton@techsagesolutions.com or 210-582-5814
